

# Why you need to be tested for cancer

## Test for Cervical Cancer

### Cervical Screening

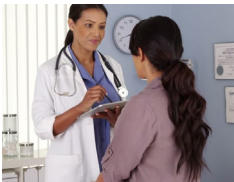

For women who are between 25 and 74.

In Victoria you can get a test to see if you have cervical cancer.

You should do the test every 5 years.

Most doctors can do this test.

Ask your doctor how much it is.

Some doctors do the test for free.

Talk to your doctor or someone you trust about cancer screening.  
Finding cancer early means you have a better chance to live longer.
